Active Threat Integrated Response Course (PER-340)

Host-Provided Facility Requirements

The host agency will be required to provide the following classroom and logistical needs:

- Building or structure, preferably a school or large dedicated law enforcement or fire training facility. The course will involve the use of both the interior portion of the building as well as exterior portions.
- Building must have electricity, functional lighting, climate control, running water, and functioning restroom facilities.
- Minimum of two long hallways, preferably at least 8’ wide, with multiple rooms for teaching tactics, rescue task force integration, and medical stations.
- Capability of using exterior areas (parking lot and common areas) of the facility.
- Preferably two-story or multiple wing structure.
- Access to the facility the day prior to the first class for classroom set up.
- Classroom capable of seating 50 personnel with ability for note taking.
- Power outlets to set up A/V equipment.
- Projector screen or white wall.
- A location to receive and secure equipment in close proximity to the class.
- 10 containers of training materials (from 25"x20"x14” to 34"x25"x24” weighing up to 140 pounds per case).
- Water coolers or bottled water for participants on day 3 practical exercises.
- 2 ambulance vehicles for day 3 practical exercises.
- 2 local agency dispatch personnel (one police and one fire and EMS if not combined operators) for day 3 practical exercises.
- 10 – 15 role players for day 3 practical exercises (8:30am-5pm).
